“Transition Designing What Remains Sustainable About Sharing Economies”
February 25, 2016

About:

Cameron Tonkinwise is the Director of Design Studies at the School of Design at Carnegie Mellon University. He also directs the School of Design's Doctoral research program. Cameron has a background in philosophy and continues to research what designers can learn from philosophies of making, material culture studies and sociologies of technology. His primary area of research is sustainable design. In particular, he focuses on the design of systems that lower societal materials intensity, primarily by decoupling use and ownership - in other words, systems of shared use. Cameron has published a range of articles on the role of design, and in particular, service design, in the promotion of the sharing economy and collaborative consumption.
